Anarcho Grow

By: T.A. Sedlak

The perfect summer read; fast-paced, intriguing, and intelligently written. The cover is beautiful, much like the descriptive story inside. You can visualize every character, every scene. Set in Costa Rica, Anarcho Grow takes you on a wild ride you will not soon forget. T.A. Sedlak is a master at painting with words. Here he creates a picture of a place and a time, frequently referred to as "Pura Vida," a way of life that is more relaxed, honest, and pure. Travel, adventure and romance interlaced with the marijuana culture, makes the setting even more enticing. After reading this book, I find myself wanting to get on the next plane to Costa Rica.
